MEMORANDUM

SUBJECT: Update of the Regulation and Policy Matrices

FROM: James A. Hanlon, Director
Municipal Construction Division (WH-547)

TO: Holders of the Matrices

This is your copy of the 1986 update material for the Construction Grants Program "Regulation and Policy Matrices" (Matrices). As you may recall, in publishing the Matrices, we indicated that annual updates would be prepared to coincide with the publication cycle of the Code of Federal Regulations (CFR). The next printing of Title 40 of the CFR will contain regulations through June 30, 1986. Accordingly, the update of the Regulation section of the Matrices contains a listing and brief description of those Federal Register notices of construction grant regulations dealing with allowable and unallowable costs and of secondary and pretreatment regulations which were published between July 1, 1985 and June 30, 1986. For grants awarded during that period, applicable regulations would be those found in the 1985 edition of Title 40 of the CFR plus the regulations identified in the Regulation Matrix of the Matrices promulgated between July 1, 1985 and the date of the grant award.

In addition, the Handbook of Procedures Matrix and the Subject Index have been updated to reflect the changes published in Transmittal Memorandum 86-1.

To accommodate the implementation of the disputes decision procedure, as set forth in Subpart L of the Part 30 regulations issued September 30, 1983, and the elimination of the appeals process along with the Board of Assistance Appeals, a "Disputes Case" section is being added to the Matrices. It contains a chronological listing of those disputing grantees or applicants whose cases were decided by Regional Administrators along with a "Subject Index" indicating the issues disputed and the grantees or applicants involved.

2<

The attached pages have been three-hole-punched so that they can be inserted into the revised Matrices which was published in April 1985. The next annual update is scheduled to be printed in September 1987.

or other policy memoranda. Therefore, if an issue under review has been the subject of an ARB decision, that ARB decision and its supporting documents should also be examined.

BOARD OF ASSISTANCE APPEALS

The Board of Assistance Appeals (BAA) heard cases brought by grantees in accordance with the EPA's disputes provisions (40 CFR Part 30, Subpart J, Disputes, 30.1100-30.1150 and 40 CFR 35.960) as supplemented by EPA Disputes Procedures (Volume 44, Federal Register page 46770 dated August 8, 1979). The Board, after reviewing briefs and other documents (from the grantee, EPA regional office and other interested parties) and, when necessary, holding a hearing, renderd a decision.

Although decisions handed down by the BAA were project specific, they often included issues which were applicable to other projects. From 1976 through June 28, 1985, 303 decisions had been rendered by the BAA with approximately 90 percent of these decisions emanating from construction grant projects. Generally, the decisions were about seven pages long and, like judicial opinions, cited earlier decisions, regulations, quotations from grantee and Agency briefs, etc.

The Office of General Counsel had prepared both a subject index and a chronological list of decisions (as of July 1985), both of which are included as Appendix A to this publication. The subject index includes 13 major subjects with multiple subheadings followed by the docket numbers. The chronological listing includes the docket number, case name and date of decision.

Because BAA (and "Disputes" — see below) decisions are not cited as frequently as regulations, policy memoranda, guidance documents or ARB decisions when issues between EPA auditors and construction grants personnel are raised, separate matrices for these decisions have not been prepared.

Although BAA decisions can be useful for background purposes, they may not be immediately applicable to specific issues. This is due to the fact that, in deciding a number of cases, the Board did not always render opinions in keeping with generally accepted interpretations of regulations and sometimes deviated from the regulations for reasons unique to the Board. The Board itself did not consider its decisions as binding legal precedent.

DISPUTES

With the publication of changes to the 40 CFR Part 30 Regulations on September 30, 1983, a revised grantee disputes procedure was established. Under Subpart L of those regulations, disagreements, arising between a grantee or grant applicant and the reviewing agency over that agency's decision with regard to a grant requirement, are decided by a Regional Disputes Decision Official (DDO). If the Regional Administrator determines that a delegated State has a disputes review process comparable to that conducted by an EPA DDO, the State's final decision will be considered the DDO's decision for disputes involving delegated functions of the Construction Grants for Wastewater Treatment Works program. If the State review is not comparable, the disputant may request the DDO to review the State's final decision pursuant to Subpart L.

Disputants may request the Regional Administrator to review a DDO's decision (or to reconsider the decision if the Regional Administrator was the DDO). When the request for review or reconsideration is filed, the grant applicant or grantee is entitled to: (1) be represented by counsel; (2) submit documentary evidence and briefs; (3) participate in an informal conference with Regional Office officials; and (4) receive a written decision from the RA.

If a grantee is dissatisfied with the RA's decision, it may file a petition for a discretionary review by the Assistant Administrator for Water (AA) at Headquarters. The AA, upon examination of the dispute, will decide whether or not to review the RA's determination. If the decision is not to review, the AA will advise the grantee that the RA's determination remains the final EPA action. If the AA decides to review the RA's determination, the review will generally be limited to the written record, although the grantee or grant applicant may be allowed to submit briefs and/or to attend an informal conference in order to clarify factual or legal issues. The AA decision would be EPA's final action.

Several EPA decisions are exempt from the disputes process, namely, decisions concerning:

1. disapprovals of deviations from regulatory requirements;
2. bid protest decisions made under 40 CFR Part 33, Subpart G;
3. National Environmental Policy Act (NEPA) decisions made under 40 CFR Part 6;
4. advanced wastewater treatment decisions made by the EPA Administrator; and
5. policy decisions of the EPA Audit Resolution Board.

The Subpart L disputes procedure is effective for all disputes filed after October 31, 1983. As of August 20, 1986, 129 decisions were issued by Regional Administrators. Also, 126 other disputes were resolved (settled or withdrawn) prior to issuance of a RA's decision. A chronological listing of grantees/applicants involved in dispute decisions is included in Appendix B along with a subject index identifying the issues disputed and the grantees/applicants involved.

For persons interested in pursuing a particular issue further, a report identifying each disputed issue and providing brief summaries (or digest notes) of all RA decisions in which that issue was resolved is available in the computerized system which tracks disputes cases - viz., "ADTRACS." The ADTRACS data system is inputted and updated at the Regional Offices and contains detailed administrative information on the status of each case. Data in ADTRACS can be readily accessed both in the Regions and at Headquarters.

USE OF REGULATION MATRIX

EXAMPLE 1:

A grant is awarded on October 15, 1977. Using the regulation matrix, identify the applicable regulations in 40 CFR Part 35, Subpart E.

1. Because the grant was awarded in October 1977, begin with the regulation matrix dated "1977" (page 46).

2. The 1977 regulation matrix indicates that between July 1, 1977, and October 15, 1977, only one change was made to Part 35, namely, a class deviation dated August 31, 1977.

3. A review of the description of the class deviation in the matrix indicates:

   a. Only the subjects user charges and industrial cost recovery, operation and maintenance manual and sewer use ordinance are affected.

   b. The deviation is further limited to changes in the payment limitations.

4. Unless the issue under review concerns the subjects discussed in the class deviation, the 1977 edition of 40 CFR contains the applicable regulations for Part 35, Subpart E.

5. In the event that it is desirable to review the preamble to the applicable Part 35, Subpart E regulations (recall that preambles are not published in the bound CFR), review page (331) in the 1977 edition of 40 CFR where those regulations begin and note:

   "Source: Sections 35.900 to 35.935-17, 39 FR 5253, Feb. 11, 1974; 39 FR 15760, May 6, 1974, unless otherwise noted. Sections 35.936 to 35.939, 40 FR 58604, Dec. 17, 1975, unless otherwise noted."

6. Sections 35.900 to 35.935-17 were originally published in the Federal Register on February 11, 1974, with portions modified on May 6, 1974. Sections 35.936 to 35.939 (procurement) were published on December 17, 1975. The regulation matrix for 1973 (pages 25-30) may be used to determine when the proposed, interim and final regulations were published and the page number for the preamble. In additon, the matrix indicates that the May 6, 1974 changes to Part 35, Subpart E were technical corrections. In like fashion, the matrix may be used to determine additional information concerning the procurement regulation (35.936-35.939) dated December 17, 1975. The identified Federal Registers will include the desired preambles.

EXAMPLE 2:

A grant is awarded on May 1, 1974. An audit issue arises concerning the cost incurred in purchasing land to be used as an integral part of the wastewater treatment process. Using the regulation and policy matrices, identify the applicable regulations in 40 CFR Part 35 and Part 4 as well as applicable policies.

1. Because the grant was awarded in May 1974, begin with the regulation matrix dated "1973" (page 25 in manual).

2. The 1973 regulation matrix indicates that between July 1, 1973, and May 1, 1974, twelve changes were made to the construction grants regulations of which five were made to Part 35, Subpart E, and one change to Part 4. Therefore, using 1973 as the base year could require the review of 12 revisions.

3. An alternate approach would be to use the 1974 edition of 40 CFR as the base year and, using the 1973 regulation matrix, note changes between May 1, 1974, and June 30, 1974. The effect of this approach is to subtract later regulations after the date of grant award.

4. Using the alternate approach in item 3 above, the 1973 regulation matrix indicates two changes to Part 35, Subpart E after May 1, 1974. The matrix further describes the changes as technical corrections (May 6, 1974) and a class deviation allowing the use of force account labor (May 5, 1974). Since neither of these changes to Part 35, Subpart E affects land acquisition, the applicable regulations for Part 35, Subpart E, and Part 4 are those contained in the 1974 edition of 40 CFR.

5. If it is necessary to review the preamble to the applicable Part 35, Subpart E regulations using the 1974 edition of 40 CFR, one must be aware of the fact that it was the practice during the earlier years to list the "source" at the beginning of the entire part rather than at each subpart. Therefore, turn to page 155 of that edition and note:

   "Source: ...

   Subpart E (§§35.900 to 35.960) at 39 FR 5253, Feb. 11, 1974; 39 FR 15760, May 6, 1974."

   From this information, a description of the regulation may be reviewed in the matrix or a copy of the appropriate Federal Register may be reviewed. Using the identical procedures, it is noted that Part 4 was amended on March 19, 1974, as shown both in the regulation matrix and on page 37 of the 1974 edition of 40 CFR Part 4.

6. Using the Subject Index for the policy matrices and reviewing the various subject headings, under Allowability/Eligibility the subject land eligibility is listed. The program issuances which discuss this subject are:

PG-49 which was not dated
PG-67 dated 4/2/76
PRM 77-5 dated 12/15/76
PRM 78-4 dated 2/17/78
Handbook

The dates for three of the policy issuances are well after the date of the grant award and, therefore, are not applicable (prudence may suggest reviewing the appropriate matrix to ensure that the policy was not retroactive). While PG-49 is not dated, the PG matrix indicates PG-47 is dated March 11, 1975, and PG-50 is dated June 6, 1975, and it may be reasonably assumed that PG-49 was issued during 1975, and therefore not applicable.

The Handbook matrix includes the subject "Site Acquisition vs. Site Preparation Cost" which is included in each edition. Looking up this subject in the first edition of the Handbook, it is noted that its conclusions are based on the same four policy issuances cited above.

7. Since the above policy issuances and Handbook references under the Subject Index "land eligibility" are not applicable due to their dates of publication, it is prudent to look for other possible subject headings and note the dates. For example, possible policy issuance candidates are:

   a. Easements, PRM 77-6, 5/4/77. Not applicable as issued after grant award.

   b. Allowable Costs, PG-64, 2/5/76. Not applicable as issued after grant award.

   c. Eligible Costs, CG 70-26, 11/9/70. Not applicable as it does not cover land. (See CG matrix.)

   d. Certificate as to Title to Project Site and Site Acquisition vs Site Preparation Costs, Handbook. Generally not applicable as Handbook issued after grant award. (See paragraph 8 below.)

   By using this procedure and reviewing the policy matrices, it is possible to determine if the subject under review is addressed in a policy issuance.

8. In the absence of specific policy guidance, it may be necessary to rely upon the broad retroactivity statement given in both PG 64 and the first TM to the Handbook. That policy indicates that the cost items listed in the Handbook and PG 64 are applicable to both P.L. 84-660 (1956) and P.L. 92-500 (1972) projects. However, the policy also states that, "In making eligibility determinations, consideration should be given to commitments previously made to grantees in the absence of prior National policy, pertinent statutes or regulations."

CODE OF FEDERAL REGULATIONS

1985

Date Published in F.R.	Affected Part and Sections	Effective Date	Comments
9-10-85 (F) 9-20-84 (F) 6-3-85	Part 133 - Water Pollution Control: Secondary Treatment Final Preamble FR p. 36879	9-10-85 & 12-9-85	This document clarifies the effective date of certain provisions of 40 CFR Part 133, Secondary Treatment Regulation (40 FR 36966, September 20, 1984) which reflected changes required by section 304(d)(4) of the Clean Water Act Amendments of 1981 and corrects amendments to 40 CFR Part 133 published June 3, 1985 (50 FR 23382).
11-4-85 (F) 2-17-84 (49 FR 6224)	Part 35 - Grants for Construction of Treatment Works Interim Final Preamble FR p. 45892	12-4-85	This regulation amends certain provisions of Part 35, Subpart I, J and L to make them clearer. Changes are made in the following areas: Alternative Technology for Small Communities, Reallotment, Combined Sewer Overflow, Phased or Segmented Treatment Works, Revised Water Quality Standards, Infiltration/Inflow and Determination of Allowable Costs. (Cost items revised pertain to: Innovative or Alternative field testing; modification or replacement of an I/A technology project; incremental costs of contracts awarded more than 12 months after Step 3 or 2+3 grant awards; mitigation of environmental impacts; house laterals; and acquiring land, easements and rights-of-way under the Uniform Act). In addition, procedures on the review of State decisions by regional dispute decision officials were modified.

Date Published in F.R.	Affected Part and Sections	Effective Date	Comments
11-12-85 (P) 2-17-84 (49 FR 6113)	Part 35 - Grants for Construction of Treatment Works Final Preamble FR p. 46648	2-10-86	This regulation addresses limitations on increases in allowable costs. For Step 3 and Step 2+3 grants awarded on or after February 10, 1986, increases in the allowable costs of the project will be limited to five (5) percent of the sum of the initial award amount of prime subagreements, the initial amount approved for force account work, the purchase price of eligible real property, and the initial amount approved for other project costs, excluding amounts approved for facilities planning and design allowances. For grants awarded prior to 2/10/86, the 5% limit also applies to contracts awarded after that date-except that contracts (on these grants) finally advertised or otherwise awarded before 2/10/86 are NOT subject to the 5% increase limit. However, generally costs of equitable adjustments for differing site conditions would be exempt.
2-4-86	Part 501 - State Sewage Sludge Management Program Regulations Proposed Preamble FR p. 4458	N/A	This proposed rule: requires States to submit to EPA, for review and approval, a description of their existing sludge management programs and plans and schedules for improving them as necessary to meet Federal sludge use and disposal criteria; and provides the procedural requirements for submission, review, approval, EPA oversight and, when warranted, withdrawal of approval of State sludge management programs.

Date Published in F.R.	Affected Part and Sections	Effective Date	Comments
2-21-86 (P) 2-8-85	Part 30 - Audit Requirements for State & Local Government; General Regulation for Assistance Programs Final Preamble FR p. 6352 40 CFR 30.802(b) and (c) 30.1230(a)	2-21-86	Interest will accrue on debts not paid within 30 days from the date of the Agency's decision that a debt is owed. For disputed amounts, interest will accrue if payment is not made within 30 days of the disputes decision official's final decision, regardless of whether the recipient requests review of the decision. EPA will charge recipients, other than State and local governments, a penalty on debts not paid within 120 days of the Agency's decision that a debt is owed. Debt collection charges are refundable only if EPA determines that the entire amount of the debt is not owed. In addition, Appendix E is added to Part 30 to incorporate OMB Circular A-128 which implements the Single Audit Act of 1984 (PL 98-502). This act establishes audit requirements for State and local government recipients of Federal assistance. Reference to audit requirements in OMB Circular A-102, Attachment P have been eliminated.
6-12-86 (P) 6-26-78 (F) 2-10-84 (F) 7-10-84 (P) 8-3-84	Parts 122 & 403 - Water Pollution: General Pretreatment Regulations for Existing and New Sources Proposed Preamble FR p. 21454		The proposed revisions are intended to: (1) make a number of substantive changes to address shortcomings in the existing regulations that have been discovered since the January 28, 1981, pretreatment amendments were promulgated; (2) respond to recommendations of the Pretreatment Implementation Review Task Force (PIRT). PIRT was established in accordance with the Federal Advisory Committee Act,

Date Published in F.R.	Affected Part and Sections	Effective Date	Comments
	Parts 122 & 403 - Continued		by the Administrator of EPA on February 3, 1984, to provide the Agency with recommendations on improving implementation of the national pretreatment program. Recommendations were made in the areas of program simplification and clarification, enforcement, resources, and roles and relationships within the national pretreatment program. The recommendations generally focus on the need for guidance, training programs, technical assistance, policy statements, and regulatory amendments in these areas; and (3) make several provisions of the pretreatment regulations compatible, where appropriate, with their counterparts in the NPDES regulations (40 CFR Parts 122, 123, 124, and 125). Twenty-eight amendments are being proposed. These fall into five major areas: (1) Pretreatment standards and requirements, (2) POTW pretreatment program requirements, (3) POTW and State pretreatment program approval procedures, (4) reporting and compliance monitoring, and (5) miscellaneous provisions. The overall impact of the proposal is to make the regulations easier to understand, reduce burdens on the regulated community, and generally improve the implementation of the national pretreatment program.

Reimbursement Projects	CG 71-9, 3/31/71; PG-18, 10/30/72; PG-22, 12/21/73; PG-30, 4/17/74; PG-40, 9/24/74; PG-40A, 10/18/74; PG-40B, 11/13/74; PG-40C, 12/4/74; PG-40D, 2/28/75

Treatment/Technical Guidance

Adequacy of Treatment — PM 72-18, 8/17/72; PM 72-21, 10/6/72

Advanced Treatment — PRM 79-7, 3/9/79

Best Practical Waste Treatment Technology (BPWTT) — PG-27, 3/30/74; PG-27A, 4/10/75

Chlorine Safety — PRM 79-1, 10/23/78

Dredge and Fill — PRM 76-4, 10/14/76

Emergency Operation — OG 71-13, 6/15/71

Infiltration/Inflow — PM 72-17, 8/11/72; PM 72-19, 8/17/72; PG-24, 2/7/74; PG-26, 3/15/74; PRM 78-10, 3/1/78

Land Treatment — PRM 79-3, 11/15/78

Ocean Discharges — PM 72-8, 4/19/72

Plan of Operation — PRM 77-3, 11/29/76

Project Segmenting — PG-33, 5/10/74; PM 72-3, 1/13/72; PM 72-15, 6/2/72

Secondary Treatment — OG 71-20, 12/31/71; PM 72-4, 2/2/72

Septic Tank Wastes — OG 71-25, 12/30/71

Sludge Disposal — PM 72-22, 11/2/72

Small Systems — PRM 79-8, 5/9/79

Stabilization Ponds — PG-16, 9/11/73

User Charge/Industrial Cost Recovery — PG-28, 4/5/74; PG-37, 7/9/74; PG-38, 7/16/74; PG-65, 5/17/76; PRM 78-6, 2/17/78

*TM 76-1 contains a revision to the general "Allowability Determinations" and reads, "The cost items listed below are applicable to both PL 84-660 and PL 92-500 projects. In making eligibility determinations, consideration should be given to commitments previously made to grantees in the absence of prior National policy, pertinent statutes or regulations."

**Only those allowable/unallowable costs which are expanded on in the Handbook are listed here. "Appendix A" costs (from 2/17/84 regs), which are repeated verbatim in the Handbook but not annotated, have been omitted.
